

We take pride in your healthcare.

Included's LGBTQ+ Health offers a safe, inclusive space for you to find healthcare, community resources, and more.

If you identify as gay, our queer- and trans-led care team wants to make sure you have access to stigma-free care for your physical, mental, and social health.

Get support from an affirming, culturally competent care team so you have what you need to thrive.

How we can help:

- We find you LGBTQ-positive, gender-affirming doctors and therapists.
- We offer advice and support on how to come out as gay to those you love.
- We connect you with LGBTQ+ support groups in your area to connect with members of the community.

What to ask your provider:

- Are HIV prevention medications like PrEP right for me?
- How can I get testing for STIs and share my results with my sexual partner(s)?
- Do you have experience working with members of the gay community?

Get care.
