

LGBTQ+ Health

We take pride in your healthcare.

Included Health's LGBTQ+ Health offers an inclusive space for you to find healthcare, community resources, and more. If you or your covered dependent identifies as a lesbian, our LGBTQ+ led care team makes sure you have access to stigma-free care for your physical, mental, and social health.

How we can help:

- We find you culturally affirming doctors and therapists who have experience treating LGBTQ+ individuals.
- We help you find care for essential tests and screening, like pap smears and pelvic exams, without judgement.
- We connect you with LGBTQ+ support groups in your area.

You deserve to be treated with respect and according to your gender identity.

What to ask your provider:

- Are HIV prevention medications like PrEP right for me?
- How can I get tested for STIs and share my results with my sexual partner(s)?
- Do you have experience working with members of the gay community?
