

LGBTQ+ Health

We take pride in your healthcare.

Included Health's LGBTQ+ Health offers an inclusive space for you to find healthcare, community resources, and more. If you or a covered dependent identifies as trans or non-binary, our LGBTQ+ led care team makes sure you have access to stigma-free care for your physical, mental, and social health.

How we can help:

- We find you gender-affirming doctors and therapists.
- We find providers who prescribe HRT, assess readiness, and prepare WPATH letters for insurance and surgeons.
- We can verify if your insurance covers gender-affirming surgery.
- We connect you to LGBTQ+ support groups in your area.

You deserve to be treated with respect and according to your gender identity.

What to ask your provider:

- Do you have experience treating patients who want to transition?
- How many of your patients have undergone gender-affirming surgery?
- Is hormone replacement therapy right for me?
